Action Points This Week

Created automatically from this week's numbers. Red = act now, amber = needs attention.

- 1. Approve the backlog: 91 inspections are still waiting for office approval. Largest backlogs: Kabelo Percy (33 waiting), Kutlwano Kuntwane (28 waiting), Lwandile Dlamini (22 waiting). Every day they wait, the 2-day standard slips further.

- 2. Chase late capturing: Jofred Steyn captured only 68% of inspections within 2 days; Hellen Modiba captured only 67% of inspections within 2 days; Kutlwano Kuntwane captured only 57% of inspections within 2 days. Remind them to capture on the day of the inspection.
- 3. Follow up on low pass rates: Cinga Ngongo at 33.3% (-1.2pt vs last week); Lwandile Maqina at 25% (-51.9pt vs last week); Kabelo Percy at 21.1% (-16.8pt vs last week). Look at which clients and products are failing and whether intervention is needed.
- 4. Get outcomes recorded: 93 of this week's inspections have no compliant / non-compliant outcome recorded, so nobody knows whether those clients are safe. Most outcomes missing: Kutlwano Kuntwane (28), Kabelo Percy (23), Lwandile Dlamini (22). An inspection without an outcome cannot count as compliant.
- 5. Chase 14 overdue samples: more than 7 days with no lab result. The list is in Section 2 — find out if each one is stuck with the inspector, the courier or the laboratory.
- 6. Set quarterly targets: 15 of 16 inspectors have no Q3 2026 target captured, so their target progress cannot be measured. Capture the targets so next week's report can track them.
- 7. Inspections dropped 19% (382 last week to 310 this week). Check leave, planning and routes for the coming week so the volume recovers.

Approved + Waiting Approval = this week's inspections. "Quarter So Far" = all inspections this quarter (Q3 2026) up to the end of this reporting week.

Inspections this week — normal inspections vs occurrence reports

Of those inspections — approved vs still waiting for approval

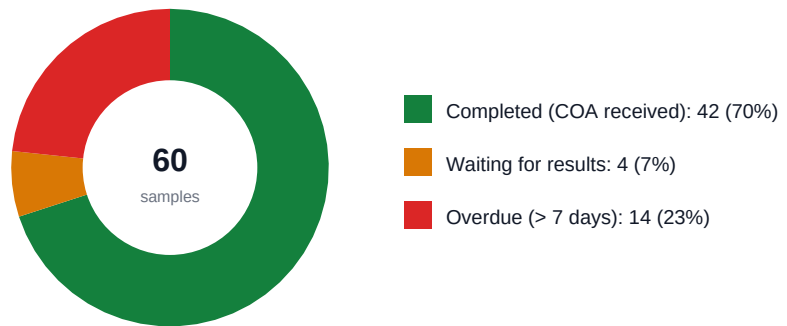

The travel effort behind these inspections:

Inspector	Inspections	KM Travelled	Hours on the Road

2. Sample Tracking

Status: 42 completed (COA received) · 4 waiting · 14 overdue (> 7 days)

"Result Back" — the laboratory certificate (COA) has been received and uploaded for the sample.

"Still Waiting" — the sample is on its way to the laboratory or is still being tested.

"No Sample Taken" — the inspection was completed without collecting a sample.

Rank	Inspector	Inspections	Samples Taken	No Sample Taken	Result Back	Still Waiting	Waiting > 7 Days

Samples awaiting laboratory results

A sample normally waits a few days while it travels to the laboratory and is tested. A row in red has a sample waiting longer than 7 days.

Inspector	Samples Waiting	Longest Waiting	Clients
Lwandile Dlamini	4	11 days	Shoprite-Sundumbili, Boxer -Atrium Mall, Shoprite Biyela Center, Bluff Meat Supply Empangeni
Gladys Manganye	5	9 days	Meat World Butchery - Witbank, Meat World Matumi Mall, Meatworld Butchery Nelspruit
Jofred Steyn	4	9 days	Merino Slagtery, Superspar Spandau
Thato Sekhotho	1	9 days	Taylor Made Foods - Bloemfontein
Mokgadi Selone	1	8 days	Nesta Foods Raw Plant
Seun Sebolai	1	8 days	Shoprite
Kutlwano Kuntwane	1	8 days	Pick n Pay Worcester
Lwandile Maqina	1	7 days	Ellis Park Butchery

3. Approval versus Capturing

Green = approved, or captured within 2 days of the inspection. Red = still waiting for office approval, or captured later than 2 days.

Rank	Inspector	Inspections	Captured Within 2 Days	Approved	Waiting Approval
1	Cinga Ngongo	30	30	30	0
2	Omphile Mokgothu	24	24	24	0

15	Kutlwano Kuntwane	28	16	0	28
16	Lwandile Dlamini	22	22	0	22

4. Weekly Compliance

% Compliant counts EVERY inspection the inspector did this week — all commodities. An inspection with no recorded outcome cannot count as compliant, so missing outcomes pull the percentage down. Exact to one decimal.

Rank	Inspector	Inspections	Compliant	Non-Compliant	No Outcome Recorded	% Compliant
1	Ben Visagie	13	13	0	0	100%
2	Seun Sebolai	9	9	0	0	100%

5	Mpeluza Xola	22	17	5	0	77.3%
6	Gladys Manganye	21	16	5	0	76.2%
7	Omphile Mokgothu	24	18	2	4	75%
8	Hellen Modiba	15	11	3	1	73.3%
9	Jofred Steyn	19	12	4	3	63.2%
10	Nelisa Ntoyaphi	24	13	6	5	54.2%
11	Mokgadi Selone	7	3	0	4	42.9%
12	Cinga Ngongo	30	10	20	0	33.3%
13	Lwandile Maqina	12	3	7	2	25%
14	Kabelo Percy	38	8	7	23	21.1%
15	Kutlwano Kuntwane	28	0	0	28	0%
16	Lwandile Dlamini	22	0	0	22	0%
Whole team — grand total		310	157	60	93	50.6%

Compliance per commodity:

Each cell shows the % compliant for that commodity. "0" = no inspections of that commodity.

"no outcomes" = the inspections were done, but no compliant / non-compliant outcome has been captured for them yet.

Green = 75% or better. Orange = 50% to 74.9%. Red = below 50%, or no outcomes captured yet.

6. Administration & Throughput

How much the office got done in the last completed week (Monday to Sunday), next to the week before it. "Change" is the difference between the two weeks. How long invoices take to upload is shown separately, in the Turnaround Times section.

Measure	This Week	Week Before	Change vs the Week Before
Inspection documents sent to clients	114	70	44 more
Invoices uploaded	202	260	-58 fewer
COAs uploaded	74	58	16 more

Who sent the most documents to clients (last completed week)

Rank	Sent by	This Week	Week Before	Change vs the Week Before
1	Nthabi	78	0	78 more
2	Mpho Motaung	36	70	-34 fewer

7. Turnaround Times

The average number of days each step took for last week's inspections. "Change" compares that with the week before: fewer days (green) means the step is getting faster; more days (red) means it is slowing down.

Stage	Avg Days	Target	Jobs	Change vs the Week Before
Inspection to documents sent	5.9	3 days	44	4.5 days faster
Capture to invoice uploaded	5.7	not set	202	0.8 days slower
Sample to COA uploaded	4.2	7 days	34	1.8 days faster
Captured to approved	2.5	2 days	53	8.2 days faster

"not set" means no target has been agreed for that step yet. "Capture to invoice uploaded" is the average for invoices uploaded during the week. We don't show a separate "documents sent to invoice" time because invoices are usually uploaded before, or without, a recorded send date — so that figure would be empty.
