## Action Points for Last Week

Created automatically from last week's numbers. Red = act now, amber = needs attention.

- 1. Approve the backlog: 60 inspections are still waiting for office approval. Largest backlogs: Hellen Modiba (11 waiting), Lwandile Maqina (10 waiting), Lwandile Dlamini (8 waiting). Every day they wait, the 2-day standard slips further.

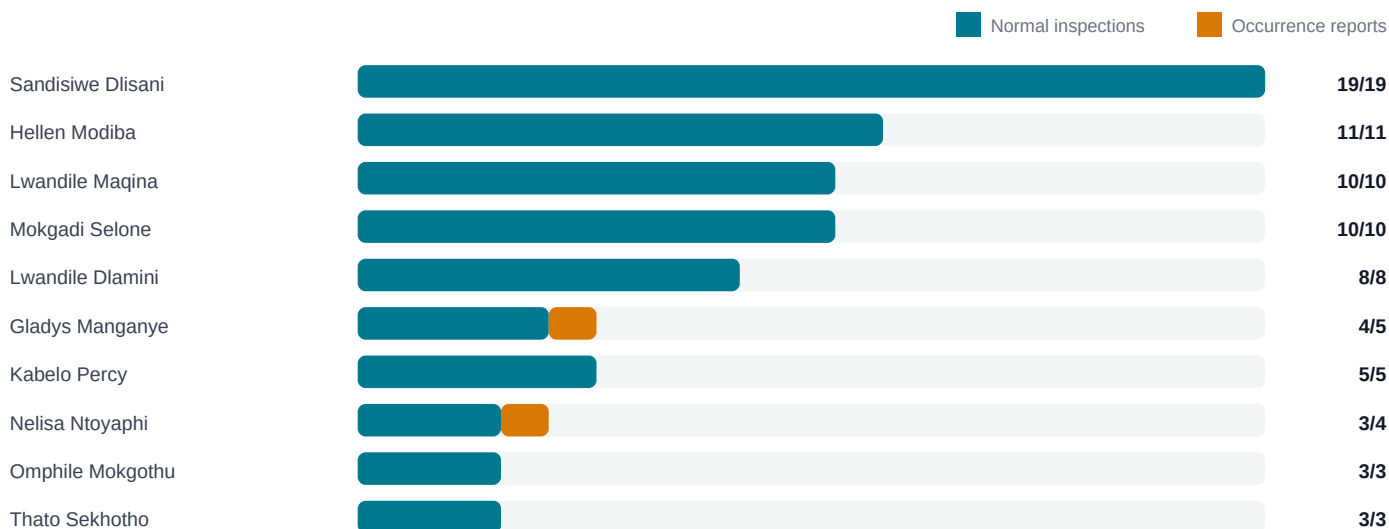

- 2. Get outcomes recorded: 59 of last week's inspections have no compliant / non-compliant outcome recorded, so nobody knows whether those clients are safe. Most outcomes missing: Sandisiwe Dlisani (11), Hellen Modiba (11), Lwandile Maqina (10). An inspection without an outcome cannot count as compliant.
- 3. Set quarterly targets: 10 of 10 inspectors have no Q3 2026 target captured, so their target progress cannot be measured. Capture the targets so next week's report can track them.
- 4. Inspections dropped 75% (310 the week before to 78 last week). Check leave, planning and routes so the volume recovers.

"Approved" plus "Waiting Approval" add up to last week's inspections. "Quarter So Far" is every inspection this quarter (Q3 2026) up to the end of last week.

### Inspections this week — normal inspections vs occurrence reports

Of those inspections — approved vs still waiting for approval

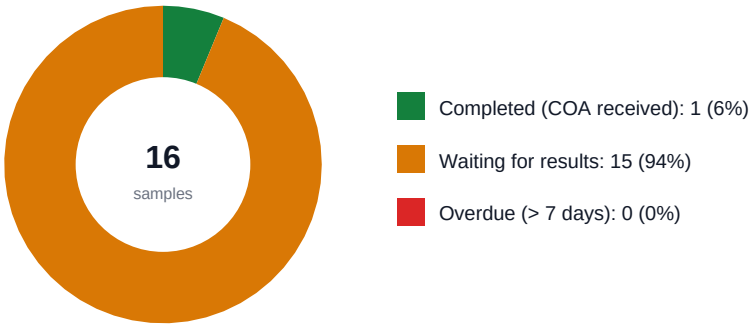

The travel effort behind these inspections:

| Inspector         | Inspections | KM Travelled | Hours on the Road |
|-------------------|-------------|--------------|-------------------|
| Sandisiwe Dlisani | 19          | 338          | 5                 |

2. Sample Tracking

Status: 1 completed (COA received) · 15 waiting · 0 overdue (> 7 days)

"Result Back" — the lab result (called a COA) has come back and been added to the file.  
"Still Waiting" — the sample is still on its way to the lab, or the lab is still testing it.  
"No Sample Taken" — the inspection was done without taking a sample.

### Samples awaiting laboratory results

A sample normally waits a few days while it travels to the laboratory and is tested. A row in red has a sample waiting longer than 7 days.

| Inspector         | Samples Waiting | Longest Waiting | Clients                                                                                                     |

## 3. Approvals & Capture Time

"Captured" = the inspection was entered into the system. Green = approved, or entered within 2 days of the inspection. Red = still waiting for approval, or entered more

| Rank | Inspector         | Inspections | Captured Within 2 Days | Approved | Waiting Approval |
|------|-------------------|-------------|------------------------|----------|------------------|
| 1    | Omphile Mokgothu  | 3           | 3                      | 3        | 0                |

| 10   | Thato Sekhotho    | 3           | 3                      | 0        | 3                |

## 4. Weekly Compliance

% Compliant = out of the inspections that have a result, how many passed (a pass is "compliant", a fail is "non-compliant"). Inspections with no result recorded yet are left out — not counted as a pass and not counted as a fail — so they don't change the score. "No Outcome Recorded" shows how many are still waiting for a result.

| Rank                     | Inspector         | Inspections | Compliant | Non-Compliant | No Outcome Recorded | % Compliant |

### Compliance per commodity:

Each box shows how many of that commodity passed, out of the ones that have a result. "none" = this inspector did no inspections of that commodity.

"not assessed yet" = the inspection was done but no result is recorded, so it is set aside — not scored as a pass or a fail.

Green = 75% or better. Orange = 50% to 74.9%. Red = below 50%. Grey = not assessed yet.

6. Administration & Throughput

How much the office got done last week (Mon 3 Aug–9 Aug), next to the week before (Mon 27 Jul–2 Aug). "Change" is the difference between the two weeks. Corporate-store jobs are not counted (they are handled centrally).

8. What's Still Outstanding

Every unfinished job across all work (not just last week), counted once per site visit — 366 outstanding, 1377 complete, of 1743 total. Office steps run in order; "Waiting for COA" is the lab's separate queue. Occurrence reports and corporate-store jobs are excluded, and only PMP/RAW jobs need an invoice.
